

Full Cover Hide Privacy Glass Screen Protector for iPhone 18 Pro

SKU: TESCRPRVIP1863P

The glass film that protects the screen of your iPhone 18 Pro, and your privacy

ONLY YOU CAN SEE THE CONTENTS ON YOUR DISPLAY

Protect your privacy with Hide Privacy Glass: **the treatment and technology** of this glass prevents anyone next to you from viewing your phone's content. The privacy filter darkens your screen at a 45° side angle while keeping it clearly visible from the front: this way, **only you**, standing directly in front of the phone, **can view messages, videos, and photos.**

CLEAR PRIVACY TECHNOLOGY: COLOR QUALITY MAINTAINED

Unlike traditional privacy glass, Hide Privacy Glass preserves **up to 70% of the display's original color performance** even after applying the screen protector. Colors remain natural, bright, and sharp, avoiding the dark or altered effect typical of other privacy screen protectors. Protect your sensitive data without compromising display quality.

FULL SCREEN PROTECTION

The **Full Cover Privacy Glass** fully protects your **iPhone 18 Pro** display. Made of **tempered glass**, it adheres perfectly to the display and provides optimal protection from **impacts and scratches**. The touchscreen remains fully functional.

The front camera and sensors remain free thanks to **dedicated cutouts** along the edges.
